

12.04.2024 | TICON FOR SAP BTP NOW AVAILABLE ON SAP® STORE

Deutsche MTM-Gesellschaft mbH today announced that its TiCon for SAP BTP solution is now available on SAP® Store, the online marketplace for SAP and partner offerings. TiCon for SAP BTP integrates with SAP Business Technology Platform and delivers professional solutions for work measurement and labor standard time to customers.

Deutsche MTM-Gesellschaft mbH today announced that its TiCon for SAP BTP solution is now available on SAP® Store, the online marketplace for SAP and partner offerings. TiCon for SAP BTP integrates with SAP Business Technology Platform and delivers professional solutions for work measurement and labor standard time to customers.

TiCon for SAP, the MTM software solution for recording, managing and processing MTM-based data directly in SAP, significantly reduces the effort and thus the costs of data maintenance in the SAP Routing. "Users appreciate working in a single system, without an additional database, without data redundancy - and above all they appreciate the transparency of the data, because TiCon for SAP means work measurement directly in the work process," says Herwig Weidle, VP Digital Solutions & Authorized Officer, Deutsche MTM-Gesellschaft mbH. With the TiCon for SAP BTP solution, users can now also carry out MTM analyses in a certified SaaS solution on the SAP Business Technology Platform - "an important step towards making the application of the MTM methodology in SAP even more convenient," emphasizes Weidle.

TiCon for SAP BTP enables you

- to manage transparent, objective and reproducible standard times based on the process building block system MTM-UAS® analysis for all manufacturing processes within your company. This is achieved by organizing them into hierarchical data levels, making them reusable and manageable throughout the lifecycle of the processes,
- to implement fast and company-wide processes and product changes. In addition, the potential of workplace design in terms of time and added value can be identified,
- to integrate into the on-premise or cloud SAP S/4HANA system with the option of transferring standard times to routing's operation within SAP's Production Planning and Control Modul (SAP PP). There are also further integration options for the customer, SAP or

third-party services and thus the possibility to support additional product lifecycle management systems outside of SAP, too.

More about the features of TiCon for SAP BTP you can find at the SAP Store.

SAP Store, found at store.sap.com, delivers a simplified and connected digital customer experience for finding, trying, buying and renewing more than 2,300 solutions from SAP and its partners. There, customers can find the SAP solutions and SAP-validated solutions they need to grow their business. And for each purchase made through SAP Store, SAP will plant a tree.

Deutsche MTM-Gesellschaft mbH is a partner in the SAP PartnerEdge® program. The SAP PartnerEdge program provides the enablement tools, benefits and support to facilitate building high-quality, disruptive applications focused on specific business needs – quickly and cost-effectively.

About Deutsche MTM-Gesellschaft mbH

The Deutsche MTM-Gesellschaft Industrie- und Wirtschaftsberatung mbH, a wholly owned subsidiary of MTM ASSOCIATION e. V., offers complete solutions for the design of productive and healthy work from a single source: consulting and engineering services in industrial engineering, software solutions and qualification offerings. With MTM (Methods-Time Measurement), companies have a tool at hand with which they can precisely calculate processes, products and personnel requirements, significantly increase productivity in the company and at the same time contribute to employee health.

The "Digital Solutions" division of Deutsche MTM-Gesellschaft mbH has been developing software solutions for the application of the MTM process language for almost 40 years. The TiCon software is available as a platform for Windows, SAP and Siemens Teamcenter.

The MTM method was developed in the mid-1940s in the USA. The MTM ASSOCIATION e. V., as the largest national association worldwide, has set itself the task of establishing and further developing MTM as a global standard via the international partner network One-MTM.
