SENIOR SOFTWARE DEVELOPER SAP ABAP (M/F/D)

To strengthen our team in Dresden we are looking for a **Senior Software Developer SAP ABAP (m/f/d)**

Your tasks:

- You design and develop extensions within our SAP add-on TiCon
- You are responsible for implementing customer-specific extensions with ABAP and ABAP objects according to user stories and specifications
- You will design and develop modern software architectures in the SAP S/4HANA environment

Your profile:

- Successfully completed studies (diploma / master's) in computer science, business informatics or a comparable training with a focus on software technology and software architecture
- Experience with JavaScript, jQuery and oData
- Confident handling of modern design patterns and programming paradigms (MVC, REST)
- Experience in classic SAP ECC development (ABAP, ABAP Objects, Dynpro, ALV)
- Experience with modern SAP technologies (CDS, RAP, HANA, Fiori, SAPUI5,) and the agile environment of software development are desirable
- Knowledge of the SAP module PP is desirable
- Fluent German and good command of English, both spoken and written
- An independent, structured way of working and a quick grasp
- Strong communication skills and team orientation

We offer:

- An excellent working atmosphere with flat hierarchies
- Development work at the Dresden location, no travel work
- Interesting projects for well-known national and international customers, e.g. from the automotive and aircraft industries
- An attractive salary with additional benefits and a wide range of training opportunities
- Further development opportunities at the location with project responsibility
- Flexible working hours and mobile work regulations - even after the pandemic!

Are you interested? Then send us your informative documents, preferably by e-mail or post. We look forward to meet you.
