

11/17/2021 | MTM-EASY IS NOMINATED FOR THE LEAN BASE AWARD 2022

MTM ASSOCIATION e. V. is entering the LeanBaseAward 2022 with MTM-Easy®, the new software solution for the quick and easy determination of assembly times. The Lean community awards this prize to companies and institutions that have made outstanding contributions to the introduction of Lean Management principles of thought and action. The award ceremony will take place during the LeanBase event Lean Around The Clock (LATC) on March 17 and 18, 2022 in Mannheim, Germany.

Anyone who would like to support the MTM ASSOCIATION e. V. in its application for the LeanBaseAward 2022 can do so on the Lean Community website. To do so, you need to register as a user* on LeanBase.de and submit your evaluation.

And this is how easy it is:

1. go to <https://leanbase.de/registrieren> and
2. vote for the MTM ASSOCIATION e. V.: <https://leanbase.de/awards/mtm-association>

The personal evaluation will then be included in the overall evaluation of the finalists. There will be an opportunity to find out more about the MTM-Easy® concept at a public pitch on November 24, 2021, which will be streamed live on LeanBase.de. The voting phase ends in January 2022.

MTM ASSOCIATION e. V. will also be represented with MTM-Easy® at the action areas of the LATC. The concept was developed to give small and medium-sized companies in particular access to the benefits of the MTM application, but without having to invest in costly software installation or MTM training. Also a topic at the LATC action area will be MTM-Motion®, an interface that allows technologies such as motion capture, virtual reality, augmented reality and human simulation to derive MTM analyses "approved by MTM ASSOCIATION" from digital motion data.

Read more about MTM-Easy® and the application for the LeanBaseAward 2022 [HERE](#).
