11.02.2021 | MTM-EASY: NOW ALSO WITH TIME DATA FOR MACHINE OPERATION AND SETUP

MTM-Easy, the cloud-based software for the determination of assembly times, provides companies with an ideal tool for reliable work planning. Release 2.5 offers even more features.

MTM-Easy, the cloud-based software for the determination of assembly times, provides companies with an ideal tool for reliable work planning. For all users: Release 2.5 offers even more features.

The advantages of the software solution at a glance:

- With MTM-Easy, assembly times can be determined quickly and easily, and potential for improvement can be discovered at the same time.
- MTM-Easy provides users with an uncomplicated overview of the current performance of their production.
- The comparison of the assembly times determined with MTM-Easy with the current consumption times immediately shows where things can be improved.
- How can it be improved? Reduce the current consumption time by appropriate measures and use the assembly time determined with MTM-Easy as a target value

MTM-Easy

- is flexible to use: mobile on the store floor or via bill of materials on the desktop,
- requires no investment in training or software installation,
- generates reliable time data that can be tracked at any time and from anywhere as a factual decision-making aid, and
- directly shows potential for improvement in the workplace, process and product.

Important for all who already use MTM-Easy: There is an update!
Release 2.5 offers:

- new time modules for the activities machine operation and setup
- the duplication of work steps
- automatic indication of the determined assembly time in hours and minutes as soon as more than 60 minutes are reached
- a tooltip for frequency of work steps and activities
- the output of the time in CSV export in decimal format

Important for all those who do not yet use MTM-Easy: Simply attend the next free webinar and/or test the software at www.mtm-easy.com
