

11/11/2021 | "MTM - OH, THEY'RE STILL AROUND TOO?"

Peter Kuhleng Lean on December 5, 2021 live on LeanTalkTV

Why can the lean community do so little with the MTM application? Already at the virtual LeanStammtisch in September, the Lean Community discussed this question with Prof. Dr. Peter Kuhleng, among others - on December 5, 2021, starting at 11 a.m., the CEO of MTM ASSOCIATION e. V. will be a live guest on LeanTalkTV. In conversation with Ralf Volkmer, Kuhleng will provide proof: Yes, they still exist - and they still do something!

The focus is on the design and improvement of value streams and processes, workflows and work systems, and what contribution MTM makes as a "simulation method in advance". Peter Kuhleng will also give an insight into the new simplicity of MTM application with the MTM-Easy software solution and into the future of MTM application with MTM-Motion as an interface between the real and digital worlds.

The Lean Community and everyone interested in the topic of work design are cordially invited to join the LeanTalk. The LiveStream on December 5, starting at 11 a.m., is available at

<https://www.facebook.com/leanknowledgebase> and also directly via [LeanBase](#)
