

02.02.2021 | PARTNER NETWORK ONE-MTM CELEBRATES 1ST BIRTHDAY

For one year now, the international partner network One-MTM has been supporting globally operating industrial companies in the implementation and uniform application of MTM, the standard method in industrial engineering. On 16 February 2021, interested parties, customers and partners are invited to an online event on the occasion of the first birthday.

For a year now, the international partner network One-MTM has been supporting globally operating industrial companies in the implementation and uniform application of MTM, the standard method in industrial engineering. The national associations of Brazil, China, Italy, Mexico, Austria, Poland, South Africa, the Czech Republic/Slovakia, Hungary, the UK, the USA and Germany offer certified MTM training, consulting on productivity management with MTM as well as software solutions for time management, and also jointly develop products and services related to the design of productive and healthy work. All partners have committed themselves to the training standard of the MTM ASSOCIATION e. V.. MTM certificates have only been issued by One-MTM since 02.02.20.

Initiators of the network are MTM ASSOCIATION e. V. and Fondazione Ergo-MTM Italia. The One-MTM headquarters are located at MTM ASSOCIATION e. V. in Germany. Gabriele Caragnano, Technical Director of Fondazione Ergo, attests that the partner network is off to a successful start. "We are experiencing a breath of fresh air in the global MTM community. We all know that in the face of rapid global change, we need to act, not just react," he emphasized. Prof. Dr. Peter Kuhlang, Executive Director of MTM ASSOCIATION e. V., also sees One-MTM on a good path. The standardization of MTM training across national borders and continents has picked up considerable momentum, particularly as a result of digitization and the switch to online offerings, he noted. "With a central contact in the organization and referrals to the partner network, we ensure that customers have everything they need at production sites worldwide - be it MTM training, consulting services or software solutions - available locally or digitally."

On Feb. 16, 2021, interested parties, customers and partners are invited to an online event on the occasion of One-MTM's 1st birthday. Speakers are Gabriele Caragnano, Fondazione Ergo, and Prof. Dr. Peter Kuhlang, MTM ASSOCIATION e. V. Register [here](#).
