# TRAINING

## Webinare

The webinars convey all contents that are also covered in the respective presence training. Besides a theoretical part and practical demonstrations, interaction, practice and self-learning phases are integrated. During the individual sessions a chat room is available for questions. The test is carried out afterwards - also online.

### Ihre Vorteile

- All training courses are also offered as webinars!
- Company internal webinars possible! You decide when the sessions take place.
- Qualification as an online trainer. Good news for MTM instructors who want to conduct webinar training in their companies!

**You are already an MTM instructor?**

**Upgrade your qualifications**

**to be an online trainer!**

# TIME MANAGEMENT

## Online-Service Time Management

No matter whether new planning, optimization/rationalization, allocation according to customer cycle or synchronization of the production stages: With only a few information about the working environment and the parts list, we can work out the time management data for you - we determine the **manufacturing times** and **personnel requirements** for your **workplaces** and **processes**.

### How it works:

You can contact us directly by phone **+49 351 26 999 666** or send us your contact data, the number of components and workstations as well as your desired task for determining time data

**a. for the actual situation**

**b. for a workplace to be redesigned**

**c. and/or a clocking**

to [helpdesk@mtm-easy.com](mailto:helpdesk@mtm-easy.com)

### Your benefits

- Continuation of the productivity enhancing activities
- Regulations on the prohibition of contact implemented (exchange only by telephone/web)
- few input data required
- rapid elaboration of production times
- Results in standard exchange format

## MTM-EasyTime

With MTM-EasyTime, the new cloud-based software for the calculation of production times, especially small and medium-sized enterprises (SME) have an instrument at their disposal with which they can easily, quickly and cost-effectively determine time data and simultaneously identify optimization potential.

- Calculate manufacturing times
- Determine and control personnel requirements
- Calculate prices and offers
- Improve work organisation
- Increase productivity
- Competitive even against low-cost countries

Simply register on [mtm-easy.com](http://mtm-easy.com) – book your desired access - and start!

### Learn more via webinar (for free)

You want to learn more about MTM-EasyTime, the application and the benefits of the cloud solution - and all this in only 45 minutes on laptop or PC? With just a few clicks you are sitting in our online seminar room! The next webinar dates (each from 9-10 am).
